

fibre **PLUS**

For bowel care and digestive health.

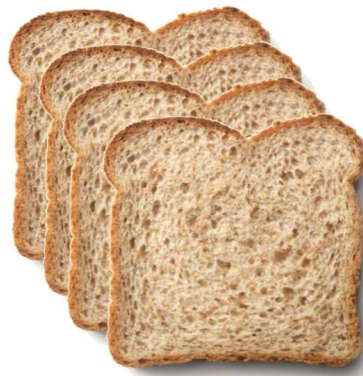

DUAL ACTION FibrePLUS combines ingredients to promote laxation as well as soluble dietary fibre ideal for constipation prevention and long term healthy bowel management.

Xylitol: draws water into the large intestine, stimulating bowel movements and causing a laxative effect.

Inulin: is a super prebiotic soluble fibre that stimulates the production of healthy gut bacteria in the large intestine to aid with digestion. Inulin in the digestive tract also limits pathogenic bacteria in the intestines and therefore aids in the prevention of infection which can cause digestive distress.

50mL

SMALL DOSE Developed specifically for aged care and high care, FibrePLUS is a bowel health product that can be administered in a small fluid dose.

Just one serve of FibrePLUS provides the equivalent fibre intake as 4 slices of wholemeal bread.

Nutrition	Average Quantity
